

## Glystro 50 RTS (Radio Technology Somfy) with Optional IR control

Long range, omni-directional radio control eliminates the need to point or aim transmitter at a drapery allowing for enhanced control of individual or groups of window coverings. With RTS, it is possible to combine hand held remotes, wireless wall switches, programmable timers, sun sensors and home automation interfaces for flexible control throughout the home.

**Simply the most versatile control platform on the market!**

Sunis Sun Sensor

Chronis Wall Timer

Telis Remotes

DecoFlex Wall Switches

#### Wiring Information:

Locate a 110V AC duplex outlet near the motor or window so the drapery will cover it. Simply plug in the Glystro 24V DC transformer to power the motor. All the controls are wireless and need no wiring.
