Motorized window coverings perform many functions in our daily lives

Convenience

Motorized window coverings allow both young and old to effortlessly open and close hard to reach window coverings at the touch of a button. Motorization also improves the quality of life for both the elderly and handicapped.

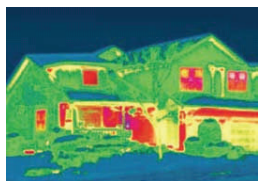

UV Protection from the Sun

Protect valuable furnishings, furniture, artwork, carpet and wood floors from the damaging effects of the sun. Window coverings provide a barrier minimizing ultra violet light from penetrating into the home.

Energy Conservation

30% of your heating and cooling is lost through the windows in a home or office building. With energy prices on the rise, it make sense to monitor and reduce energy costs where possible.

This infra-red thermal image of a house depicts the heat loss through the windows. Using a blind or drapery can reduce this loss and save you money

by reducing heating and cooling costs.

Applications for Motorization

Residential

Hospitality

Home Theater

Restaurant

Commercial / Office

With a push of a button, presentations are a snap by reducing glare and controlling light in Board Rooms, and Conference areas. Sensors and timers operate shades to help reduce heating and cooling loads while buildings are un-occupied.

Protect your most valuable possessions

Child Safety

Dangling cords present a danger to both children and pets. Motorized window coverings eliminate the pull cords on drapery and shadings eliminating an ever present hazard in the home.

Security

Protecting your home and contents from prying eyes and uninvited guests can easily be accomplished with motorized shades. Zones of window coverings can be programmed in various modes to make your house look occupied while away at work or on

Reliability

Peace of Mind

All motors, components, drapery and shadings are guaranteed for 5 years from date of purchase.

Affordability

Over the past few years, great strides have been made to refine and deliver this technology making motors and control systems affordable to many consumers.
